<b>General Information (Origin of Request)</b> <input type="checkbox"/> User Requirements (URD) or GUI Business Functionality Document (BFD) <input checked="" type="checkbox"/> Other User Functional or Technical Documentation (SYS)		
<b>Request raised by:</b> 4CB	<b>Institute:</b> 4CB	<b>Date raised:</b>
<b>Request title:</b> Multiplex Editorial Change Request (for R2026.JUN)		<b>Request ref. no:</b> T2S 0863 SYS
<b>Request type:</b> Common	<b>Classification:</b> Maintenance	<b>Urgency:</b> Normal
<b>1. Legal/business importance parameter<sup>1</sup>:</b> Medium		<b>2. Market implementation efforts parameter:</b> n/a
<b>3. Operational/Technical risk parameter:</b> n/a		<b>4. Financial impact parameter:</b> No cost impact
<b>Requestor Category:</b> 4CB		<b>Status:</b> Registered

**Description of requested change:**

Editorial changes regarding on UDFS, UHB and DMT File Format Specification (for R2026.JUN)

**Reason for change and expected benefits/business motivation:**

The editorial changes relate to either the UDFS or UHB for R2026.JUN. Their incorporation into the UDFS or UHB for R2026.JUN is required for clarifying the documentation underlying the software.

Please note that the changes referring to UDFS for R2026.JUN will also be reflected, when relevant, into the message documentation published in MyStandards.

A Security can have an Issuer CSD as well as different Technical Issuers. When <IssuerCSD> is used as a search criterion in the Settlement Instruction Query, the Query not only takes into account the original Issuer CSD, but also the Technical Issuers, which leads to the query not returning the expected Settlement Instructions in the semt.027 result. The issue occurs for both U2A and A2A.

## Securities Settlement Transaction Query V01 (DRAFT7semt.026.001.01)

#### 4 EUROSYSTEM UPDATE [Internal Review]: page 1742 (UDFS-chapter 4.2.1 ISO 20022 Codes); Addition of CCPC [CCP Collateral] in code list "ExposureType12Code"

Addition of code CCPC [CCP Collateral] between CCIR and COMM in code list "ExposureType12Code" in T2S UDFS chapter 4.2.1 ISO 20022 Codes

- Currently, the data type of the code list is ExposureType2Code in the UDFS
- With T2S CR-809, the data type will become ExposureType12Code but only the new code UDMS will be added
- However, a code CCPC [CCP collateral] between CCIR and COMM is also specified in the code list ExposureType12Code on MyStandards
- The fact that this code CCPC is missing in the UDFS is due to a previous release when the datatype of ExposureType2Code had already been changed to ExposureType4Code on MyStandards but this change had not been implemented in the UDFS

UDFS-chapter 4.2.1 ISO 20022 Codes, page 1742

##### ExposureType12Code

CODE	NAME
BFWD	BondForward
CCIR	CrossCurrencyIRS

6 EUROSYSTEM UPDATE [SDD-PBR-147, PBI-235888]: page 430 (CRDM UHB Book 1 - chapter 2.3.9.3 Invoice Configuration – New/Edit Screen); The field “Amount Threshold” of BILL

## GUI Invoice Configuration New/Edit screen must be limited to accept values up to 99,999,999,999,000,000

The invoice configuration is used to configure billing process parameters at service and system entity level. In CRDM GUI - Invoice Configuration New/Edit Screen it is possible to set the parameter (Amount Threshold) applied to service item dependent on parameter.

NCBs must fill in the field "Amount Threshold" in invoice configurations of AS participant because this field is the parameter on which 5009 service item consumption cost calculation relies on.

The price to apply to 5009 Service Item depends on the range in which the value of "Amount Threshold" falls, indeed the AS pricing scheme are defined bands for which different prices are applied.

The last band contains all values greater than 50,000, so AS setting Amount Threshold with the maximum acceptable value by CRDM GUI (999,999,999,999,999,999) should be priced with the price of last band of the service item 5009.

dependencies); Optional inbound liquidity transfer in case of negative NCB account balance at liquidity cut-off

Editorial changes

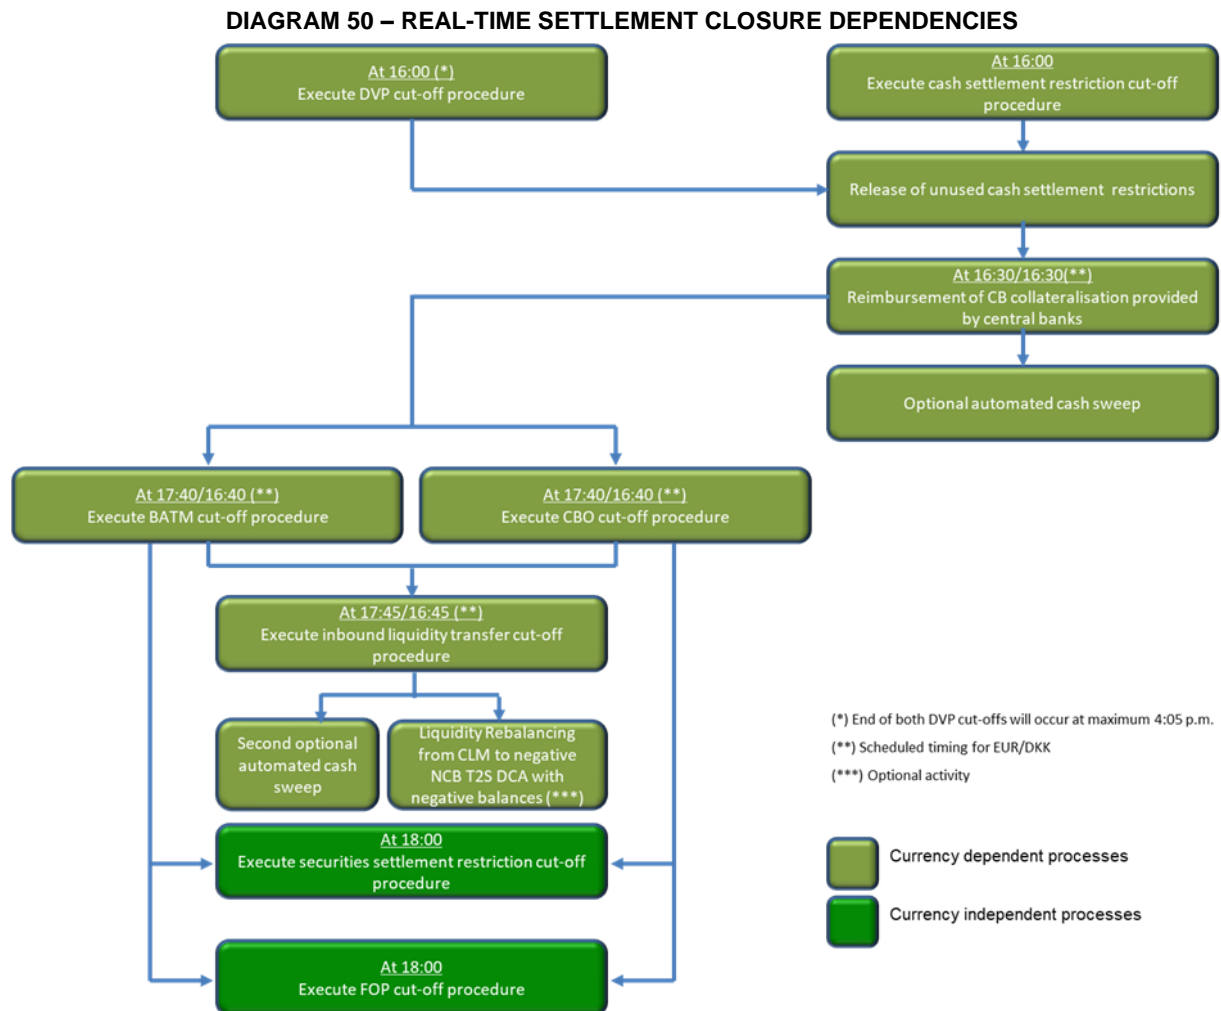

UDFS-chapter 1.4.4.4.5 Real-time settlement closure schedule, page 201

Update of diagram 49:

**DIAGRAM 49 – REAL-TIME SETTLEMENT CLOSURE SCHEDULE**

Update of diagram 50:

**TABLE 47 - DEPENDENCIES DURING THE REAL-TIME SETTLEMENT CLOSURE**

T2S DETAILED PROCESSES	DEPENDENCIES	
	TYPE OF DEPENDENCY	DESCRIPTION
[...]	[...]	[...]
Execute incoming liquidity transfer cut-off procedure	BATM cut-off completed and CBO cut-off completed And Time: 17:45 (DKK 16:45)	This process starts after the completion of the execution of BATM and CBO cut-off procedures. In addition this process does not start before 17:45. In case of emergency situations a change of incoming liquidity transfers cut-off is only possible according to a process to be defined in the T2S MOP.

<u>Second optional automated cash sweep</u>	Inbound liquidity transfer cut-off completed	This process starts after the completion of the execution of inbound liquidity transfer cut-off procedures.
<u>Liquidity rebalancing from CLM to NCB T2S dedicated cash accounts with negative balances</u>	<u>Inbound liquidity transfer cut-off completed</u>	<u>This process starts after the completion of the execution of inbound liquidity transfer cut-off procedures.</u>
[...]	[...]	[...]

UDFS–chapter 1.4.4.4.7 Real-time settlement closure dependencies, page 205 ff.

**TABLE 48 - PROCESSES DURING THE REAL-TIME SETTLEMENT CLOSURE**

T2S PROCESSES	DESCRIPTION OF THE PROCESSES
[...]	[...]
Reimbursement of CB collateralisation provided by central banks	<p>T2S performs the following during the automatic reimbursement process:</p> <ul style="list-style-type: none"> <li>! T2S releases all “hold” reverse collateral Settlement Instructions linked to CB collateralisation (i.e “hold” reverse collateral Settlement Instructions generated during the process of auto-collateralisation by a payment/settlement bank with its Central Bank);</li> <li>! T2S attempts the settlement of all the released reverse collateral Settlement Instructions linked to CB collateralisation with, if needed for a credit consumer: <ul style="list-style-type: none"> <li>– Internal rebalancing of cash between its T2S DCA;</li> <li>– And/or, sourcing additional liquidity from its Central Bank through the creation of collateral re-location Settlement Instructions;</li> </ul> </li> </ul> <p>When the available amount is insufficient for the settlement of all reverse collateral instructions T2S informs the relevant CMS for an utilisation of its credit facility in the relevant RTGS system (creation of collateral relocation Settlement Instructions). In such cases, it is the responsibility of the CMS to inform the RTGS system to facilitate the update of the credit utilisation/provision of overnight credit facilities. This process is outside T2S; Note: T2S does not perform an automatic release of reverse collateral Settlement Instructions related to reimbursement of intraday client-collateralisation. In parallel, T2S performs the following:</p> <ul style="list-style-type: none"> <li>! Settlement of: <ul style="list-style-type: none"> <li>– Settlement Instructions other than the ones for which cut-off is reached;</li> <li>– Settlement of securities Settlement Restrictions;</li> <li>– All liquidity transfers (i.e. inbound, internal and outbound);</li> </ul> </li> <li>! Execution of static data maintenance instructions;</li> </ul>

	<p>I Execution of Amendment Instructions, Cancellation Instructions and Hold/Release/Partial Release Instructions;</p> <p>I Generation of reports triggered by business or time events;</p> <p>I Responses to queries received via U2A or A2A.</p>
<p><u>Second optional automated cash sweep</u></p>	<p>This period determines the start of the optional automated cash sweep based on the set-up of stand-ing liquidity transfer orders.</p> <p>T2S creates cash sweep related liquidity transfers for the remaining cash of each T2S Dedicated cash account and central bank cash accounts to transfer it to the specified RTGS account.</p> <p>In parallel, T2S performs the following:</p> <p>I Settlement of:</p> <ul style="list-style-type: none"> <li>– Settlement Instructions other than the ones for which cut-off is reached;</li> <li>– Securities Settlement Restrictions;</li> <li>– All liquidity transfers (i.e. inbound, internal and outbound);</li> </ul> <p>I Execution of static data maintenance instructions;</p> <p>I Execution of Amendment Instructions, Cancellation Instructions and Hold/Release Instructions;</p> <p>I Generation of reports triggered by business or time events;</p> <p>I Responses to queries received via U2A or A2A.</p>
<p><u>Liquidity rebalancing from CLM to NCB T2S dedicated cash accounts with negative balances</u></p>	<p><u>If the Central Bank has set up a Liquidity Transfer Order in CRDM, T2S triggers the rebalancing from CLM of the exact cash amount necessary to reach zero amount on the Central Bank account in T2S.</u></p> <p><u>If the liquidity cannot be transferred from CLM to T2S the affected balances exceptionally remain negative overnight.</u></p>
<p>[...]</p>	<p>[...]</p>

Editorial changes
-------------------

UHB-chapter 2.4.2.4 Inbound Files - Search/List Screen page 620 ff.

**Context of Usage** This screen contains a number of search fields. By inputting the relevant data, you can search for inbound files. The search results will be displayed in a list, which is sorted by the values of the '~~Entry Date and Time~~ Entry Timestamp' column in descending order (default setting). After selecting an entry, you can proceed further by clicking on the buttons below.

**Screenshot** *will be provided after implementation*

**Field Description**

Inbound Files – Search Criteria	
[...]	[...]
<del>Entry Date and Time</del> <u>Entry Timestamp</u> from*	<p>Enter the lower bound of the search range for the calendar date and time from which the inbound file entered the system or use the <i>calendar</i> icon.</p> <p>Required format is: YYYY-MM-DD hh:mm:ss</p> <p>Default value is the current calendar date and time.</p> <p>The '<del>Entry Date and Time</del> <u>Entry Timestamp</u> from' date must be earlier than or equal to the current business date and earlier than the '<del>Entry Date and Time</del> <u>Entry Timestamp</u> to' date.</p> <p>References for error messages: [ ] <b>Error!
