

EUROPEAN CENTRAL BANK

EUROSYSTEM

The ESCB's Integrated Reporting Framework

—
Antonio Colangelo

21 June 2022

Item 2.2
Dialogue with the banking industry on ESCB statistics

Agenda

1. Introduction

2. The IReF cost-benefit analysis

3. The launch of the IReF Programme

Agenda

1. Introduction

2. The IReF cost-benefit analysis

3. The launch of the IReF Programme

1. A changing context

To allow for a quick start of the European statistical collection, NCBs were given the possibility to collect the requirements arising from ECB statistical regulations through their well-established national reporting frameworks. This led to heterogeneous national approaches, e.g. in terms of data models, exchange formats, timelines

In addition, at European level the reporting obligations were progressively specified in a number of subsequent legal acts, with possible overlaps and heterogeneous data models

Large sets of (statistical) country-specific requirements have gradually enriched these national collection frameworks

NCBs defined reporting requirements

... individually!

Reporting overlaps existed

... to various degrees!

1. New opportunities

NCBs defined reporting requirements

Reporting overlaps existed

... One regulation
... Redundancy-free

Standardisation via the IReF

ECB-UNRESTRICTED

IReF
collection
layer

- ONE euro area
- ↓
- ONE directly applicable regulation
- ↓
- ONE largely standardised implementation

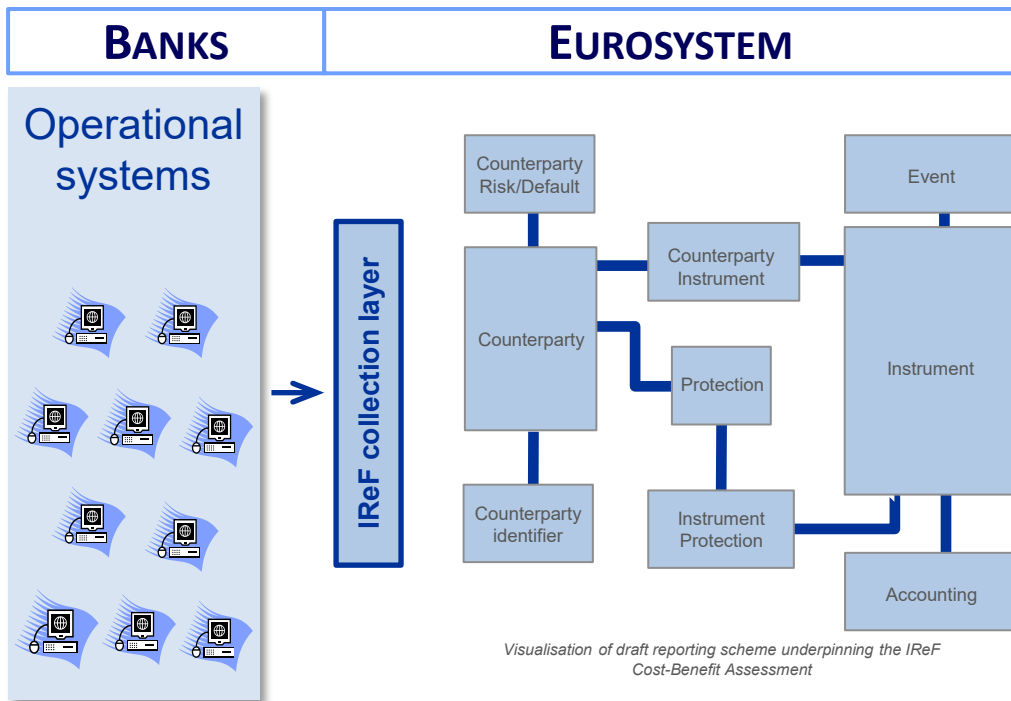

Datasets currently in scope of the IReF

ECB-UNRESTRICTED

➤ Plus residency-based datasets by international organisations (BIS and IMF)

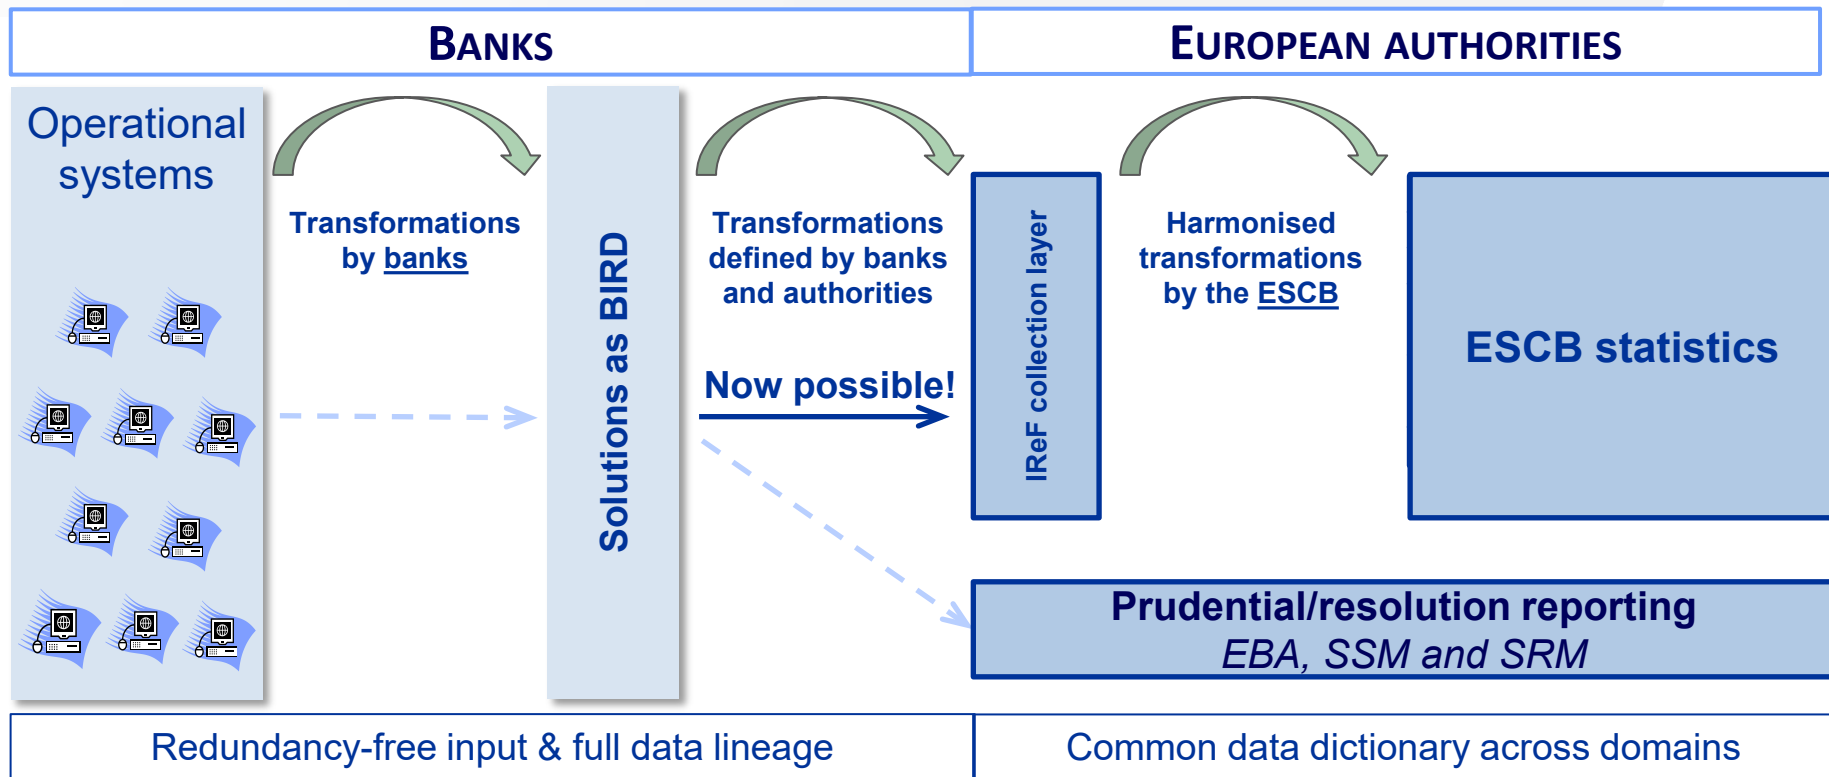

1. The future of reporting (1) – Common IReF features

Visualisation of draft reporting scheme underpinning the IReF
Cost-Benefit Assessment

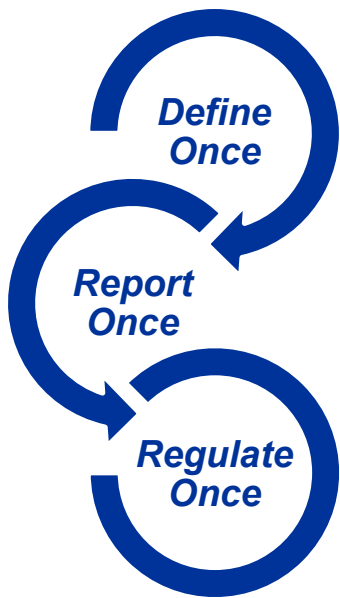

- Common (entity-relationship) model
- Same **dictionary** “standardisation”
 - In principle, common with prudential and resolution requirements
- Same **reporting schedules**
- **Additional granularity** compared to existing datasets
 - Integrate existing reporting lines and avoid duplications

1. The future of reporting (2) – The bigger picture

1. IReF consolidates existing ESCB statistical reporting

In line with the industry demands:

by using a common data dictionary with all the data definitions;

by enhancing reusability and interoperability of the data;

by consolidating all ESCB statistical requirements for banks in a unique legal act applicable across the euro area (might be adopted by other EU Member States)

Agenda

1. Introduction

2. The IReF cost-benefit analysis

3. The launch of the IReF Programme

2. The IReF cost-benefit analysis

Assess impact of the IReF on supply and demand side

- In strict cooperation with the banking industry and other relevant stakeholders

Adapts the features of ESCB merits and costs procedure

- **Qualitative Stock-Taking** on the state-of-play across domains and countries
 - to help design scenarios on data collection and statistical production aspects (e.g., reporting dates, data frequency, derogations/sampling, transactions)
- **Cost-Benefit Assessment (CBA)**
 - to explore preferences across the scenarios to identify the optimal approach that would best suit the industry and Eurosystem/ESCB

2. Main outcome of the CBA

Strong support for the IReF by the banking industry and other relevant stakeholders

By bank size: support is highest among large and mid-sized banks, but benefits outweigh costs also for small banks

By bank type: support is highest among members of cross-border groups

Eurosystem-wide derogations will also mitigate costs for small institutions

Agenda

1. Introduction

2. The IReF cost-benefit analysis

3. The launch of the IReF Programme

3. The IReF Programme

Based on the wide support for the initiative, in December 2021 the GovC approved:

- The launch of the **design phase (business)** of the IReF Programme, with a stepwise implementation in the medium term
- The publication of high-level CBA results and the ESCB medium-term strategy

The IReF Programme would consist of several activities

- E.g. new business organisation through the ESCB, definition of the IReF content, reflection upon IT infrastructure solutions, dependencies on reference information

Dedicated [ECB Press release](#) on 17 December 2021

3. Business (non-IT) Design Phase Objectives

Defining the IReF reporting requirements

Input from the cost-benefit assessment

Treatment of national statistical requirements

Preparatory work for establishing a legal framework

Business organisation of the ESCB Statistics function

Collection layer
A standardised Eurosystem statistical data collection from banks

3. Identifying the features of the IReF reporting

Continue analysing the CBA results

- Identify for each characteristic of the reporting (e.g. content, proportionality, implementation aspects) the scenarios that would best suit the industry and Eurosystem/ESCB
- Publication of results from the banking industry on ECB website in late summer 2022

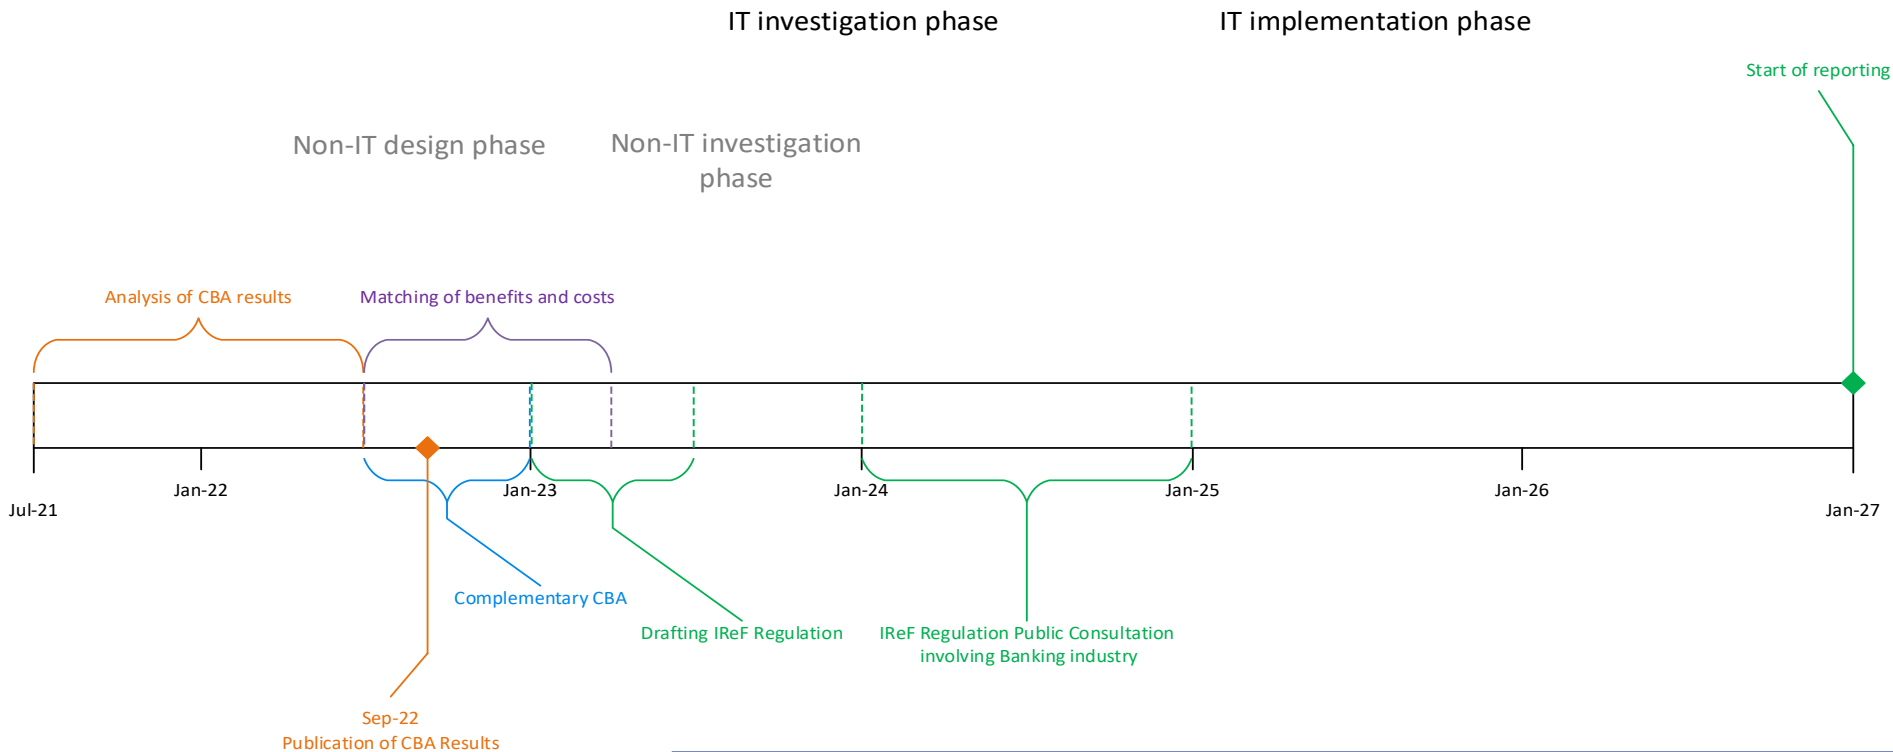

Complementary assessment in second half of 2022 [tentative]

- address additional topics of relevance for the IReF
e.g. additional gaps that have been identified, integration of group module of Securities Holdings Statistics, inclusion in the IReF of national requirements that are 'common' across countries

Matching of benefits and costs will start in Q4 2022

- Select the scenarios to be implemented in the IReF Regulation
- Define the IReF reporting scheme

3. The broad envisaged timeline

Thank you!

Annex: The future of reporting – IReF scope
